

Appendix 1. Scree plot for activity space components

Appendix 2. Significance of components in clustering analysis (One-way ANOVA)

Variables	df (within groups)	df (between groups)	F	P
Leisure specialization	849	2	12.1	.000
Elongation	849	2	6.9	.001
Polycentricity	849	2	84.2	.000
Exteriority	849	2	.577	.562
Intensity of activities	849	2	4.2	.015
Volume of travel distances	849	2	26.6	.000
Size	849	2	.391	.677
Car	849	2	3108.1	.000
Public transport	849	2	1689.6	.000
Active travel	849	2	1461.3	.000

Appendix 3. Kruskal Wallis Test

Wellbeing measures	χ^2	df	P
Material standard	49.85	2	.000
Health	20.62	2	.000
Personal relationships	0.32	2	.851
Community	17.45	2	.000
Leisure time	40.85	2	.000
Job and studies	22.76	2	.000
Local environment	8.67	2	.013
Life achievement	16.71	2	.000
Safety	23.85	2	.000
Life	18.42	2	.000
